

## Liquid sampler c/w air driven pump and carry on frame

This DPM sampler in system purge configuration allows the product being sampled to be pumped continuously through the sampler to ensure the retrieval of a representative and contamination free sample. The carry on frame c/w flexible hoses and quick connects create a portable sampler ideal for sampling liquids on board ships.

### BASIC SPECIFICATIONS

Material	SS316(L).
Sleeve Type available.	500cc sleeve with bottle retaining clip. Larger/smaller sample size available.
Needle Assembly	Single piece VTO needle assembly with vent to outlet connection 1/4" F NPT. Process/Vent needle ID: 1.35 mm.
Valve Operation	Three-way ball valve. Type dependent on the product to be sampled. Manual.
Connections	Process in/out: flexible hoses with quick connect couplings. Vent: 1/4" F NPT, c/w adapter suitable for A2 gas filter. Air inlet pump: 1/4" F NPT.
