DOPAK® Process sampler type S32-LG

system purge with additional safety expansion cylinder configuration

The ability to purge the sample point ensures optimal retrieval of a representative, contamination free sample. The S32-LG type samplers provide a system purge in addition to sampling in a sample cylinder and the ability to depressurise the quick connect couplings before disconnecting the sample cylinder. The unique design offers a one handle operation by multiple valves. Furthermore, it offers 100% filling rate, since the main cylinder is equipped with an additional safety expansion cylinder. Should pressure build-up occur in the main cylinder, the relief valve opens to the safety cylinder. These features provide sample accuracy and safety.

**1 OPERATION/FUNCTION**

0 - off
Install the sample cylinder and connect the flexible hose to the bottom side of the sample cylinder. Open the needle valves of the sample cylinder.

1 - system purge
Turn the handle to the “process” position allowing the sample cylinder to be filled. To ensure representative sampling, this position can be held for any required time.

2 - off
Turn the handle to the “off” position. Close the two needle valves of the sample cylinder.

3 - depressurise/vent
Turn the handle to the “depressurise” position. The internal connection between the sample cylinder and the vent connection has now been made. The quick connects are being depressurised to the vent connection.

4 - off
Turn the handle to the “off” position. Disconnect the flexible hose. Remove the sample cylinder and connect the flexible hose to the top quick connect.

**2 TYPICAL P & ID**

system purge with additionalsafety expansion cylinder configuration

### FEATURES/ADVANTAGES/PROPERTIES

- Sampling in cylinder at process pressure
- 100% filling rate
- Safety expansion cylinder
- Representative sampling
- Zero dead volume
- Closed sampling
- One handle operation of multiple valves
- Purging of sampler
- No direct connection between vent line and process lines
- Depressurising of quick connect couplings

### BASIC SPECIFICATIONS

<table>
<thead>
<tr>
<th>Material</th>
<th>SS316, SS316L</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cylinder type</td>
<td>500cc cylinder.</td>
</tr>
<tr>
<td>Valve</td>
<td>Three-way ball valve type W83, PTFE seats, Viton A O-rings.</td>
</tr>
<tr>
<td>Pressure range</td>
<td>103 bar @ 20°C (1500 psig @ 70°F).</td>
</tr>
<tr>
<td>Temperature range</td>
<td>-17/+232°C (0/+450°F).</td>
</tr>
<tr>
<td>Operation</td>
<td>Manual.</td>
</tr>
<tr>
<td>Connections</td>
<td>1/4&quot; FNPT, Pressure gauge included</td>
</tr>
</tbody>
</table>

#### Please note:

- The above is a basic specification only. DOPAK® Samplers can be offered with a wide variety of options as mentioned below.

### OPTIONS

- Spring return handle
- Lockable handle
- Pipe stand
- Block valve
- Flow meter
- Enclosure
- Sample cooler
- Exotic Materials
- Larger/smaller sample size

For more information please refer to our sheets:
Components for DOPAK® process samplers.
